

Cable reserve holder

RAB-VP-R01-A1

■ RAB-VP-R01-A1, RAC-VP-R01-A1

Cable reserve holder is designed to store and protect especially metallic and optic installation cables inside the cabinet. There are two ways of installation of the cable reserve holder into the cabinet:

- vertically (10U) on the 19" vertical rails (usually on the back side of the cabinet)
- horizontally between the vertical rails as the classic shelf

Support mandrels, which are mounted around the centre hole, provide bending radius and prevent damage of the stored cables.

Package contains

cable reserve mounting plate	1x
support mandrel – height 1 U	4x
support mandrel – height 2 U	4x
short mounting holder	4x

long mounting holder	2x
central vertical rail holder for 19" accessories	2x
