RAX-MS-X36-X1

Tritón plastic swing handle brings revolutionary innovation. Just by replacing the plastic inlet you can choose classic or half-cylindrical lock. Even while in use, on fully equipped cabinet you can easily switch simply by changing a few parts at a higher security level or the general key systems.

Cylindrical lock must have an adjustable rotating latch.

The handle is not compatible with the older model.

■ Multi point locking systems

We have been supplying these systems for many years and especially cabinets with a high IP rating could not exist without them. With the new handle comes also the ability to use a wider range of lever and sliding multi point locking systems from reputable manufacturers.
