Declaration of Environmental Conformity

Dear Sir or Madam,

Pollmann Elektrotechnik GmbH manufactures products for electrical installation e.g. busbars, terminals and all accessories for panel builders and domestic installation.

We are committed to minimise the impact of its activities on the environment and to that the use of cadmium, asbestos, PCB or mercury within the company has been prohibited for many years. Our products meet the requirements of all environmental legislations that relate to the company. We specify the use of additives at levels strictly below the limits set by legal requirements and no banned solvents or detergents are used in any manufacturing process. These rules are also a main constraint for all new designed products.

Pollmann Elektrotechnik GmbH specifies raw materials, semi-finished products, other purchased parts as well as used methods based on the following European directives:

- 2011 / 65 / EU "RoHS II" (incl. ban of deca-BDE)
- 2005 / 69 / EG "PAK"
- 2006 / 1907 / EG "REACH"
- 2006 / 122 / EG "PFOS"

Our products also do not contain any substance of the last release of SVHC (substances of very high concerns) issued from the ECHA.

As a result of this our products are environmentally friendly and non critical for recycling processes.

If you have any further questions please do not hesitate to contact us.
